# BUSINESS CONTINUITY & DISASTER RECOVERY

## ON-SITE SERVERS

### Introduction to Business Continuity & Disaster Recovery

No one ever wants to think about 'what could go wrong', however, an effective BCDR solution could be the difference between your organisation surviving a disaster or not.

Every week across the country, we hear of hundreds of businesses falling victim to cyber-attacks, break-ins and fires where equipment, such as servers, is often compromised and unsalvageable.

During a disaster like this, every second costs money.

Without a BCDR solution, you are putting your business at severe risk.

### How Can a BCDR Solution Help My Business During a Disaster?

A BCDR solution enables you to bounce back and continue operating following a disaster, no matter what caused it.

Our BCDR solution takes multiple daily backups of your server and securely stores them in the cloud, ready for instant restoration during a crisis.

Restoring your backup to another server takes minimal time (compared to salvaging documents from a burnt out server) or even worse, recreating them.

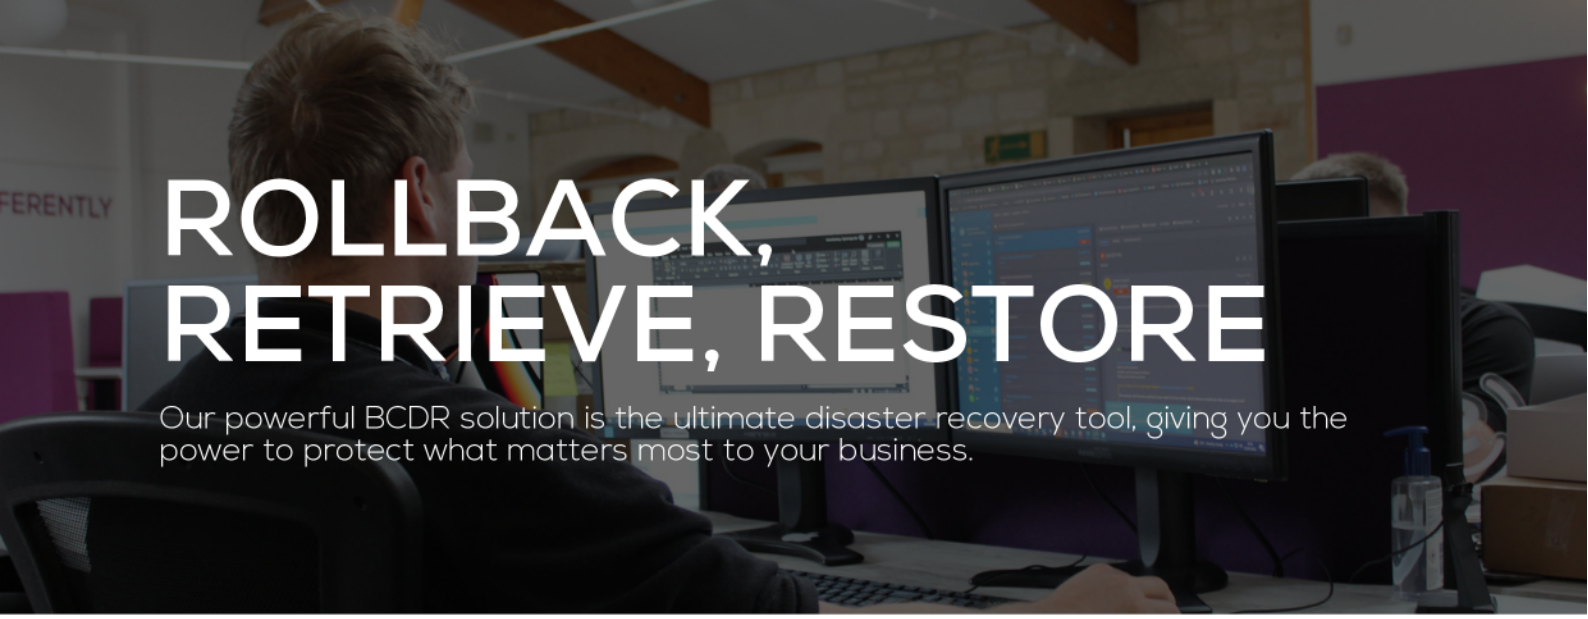

You can learn more about our solution on the next page.

# ROLLBACK, RETRIEVE, RESTORE

Our powerful BCDR solution is the ultimate disaster recovery tool, giving you the power to protect what matters most to your business.

## Some Benefits of Our BCDR Solution Include:

### No File Is Missed
With daily backups taken 3x a day and the option to increase the frequency, you can feel confident that all of your files are backed up.

### Full Encryption
Featuring top-level encryption, your files are safely stored across multiple data centres, ready for when you need them.

### Instant Cloud Access
In the event of a disaster, your files can be immediately accessed via the cloud, enabling you to continue working until your server is restored.

### Save Money
Avoid costly repercussions such as loss of productivity, loss of business and reduced consumer confidence with our BCDR solution.

### Rapid Rollback
With rapid rollback, your files can be restored to a new server in a matter of minutes. 'Business as usual' is only a few clicks away.

### Backup Validation
With backup validation, our BCDR solution ensures all stored files & applications are bootable and accessible, ready to be restored.

## PREVENT A POTENTIAL DISASTER WITH BCDR
